One of the reasons for this is that Democratic principles have never been properly ex-plained in the majority of Welsh hamlets. Then again, the Welsh have an opinion that the Republican party of this country is the Liberal party of England and Wales. This is the most erroneous belief. It is to dispel these incorrect views, and to disseminate Democratic principles among the Welsh, that these clubs are to be formed. Every State in the Union is to be thus organized." A STATE LOAN COMMISSION Likely to Be Favored by the New Populist Governor of Kansas.

TOPERA, KAN., Dec. 30.-It is stated by a Populist very near to Governor-elect Lewelling that the Governor's inaugural address will advocate the creation of a State loan commission. Said this Populist today: "The Governor understands, as we all do, that every year, no less in Kansas than in every other State, thousands of industrious citizens are made homeless by foreclosures of mortgages. This is largely Gaboon, he doesn't seem to have a very high due to high rates of interest and brokers' charges. A loan commission composed of conservative men would be able to oans through the agency of the County Commissions in the various counties.

"If thought advisable the counties might guarantee the loans to the lenders, and thus the mortgage would be secure. Mortgage loans thus guaranteed by the State would make it easy to obtain loans from the capitalists of the East at a very low rate of interest. The expense of the commission would be paid by the borrower, and this charge would be only a small fraction of the enormous sum they annually pay brokers."

JERSEY CITY, N. J., Dec. 30.-Thirtyfive Democrats from all sections of New Jersey, who are among the recognized adherents of Mr. Cleveland, have met here and adopted resolutions opposing the eaudidacy of Governor Abbett for Senator. A committee was appointed to prepare for presentation to the Legislature the reasons why he should not be elected.

of suffocation by drowning. The intense congestion that these artificial attacks produce might determine the rupture of a blood vessel or the stoppage of the heart; it is therefore
